THRU: Director  
Central Intelligence Agency  
Washington, D.C. 20505

STATINTL

TO: [REDACTED]  
Central Intelligence Agency  
Washington, D.C. 20505

1. It is a pleasure to commend you for your outstanding presentation of the technical paper "Enemy Operational Practices and Considerations" at the Seminar on Road Capacity Estimating Methods held in Washington, D.C. by the Engineer Strategic Studies Group during the week of 9 September 1968.

2. This was the first effort in many years to address the subject of road capacity estimation in the broad context of the expertise reflected by the representatives participating in the seminar. Your contributions and those of your agency were greatly appreciated. They added significantly to the overall accomplishments. Your knowledge of the operating standards and methods of other countries was of particular value and materially aided in filling the data gap of that phase of the seminar.

3. As Chairman of your working panel, you exhibited exceptional understanding and handled the discussions in a superlative manner. You displayed a most confident and effective attitude and brought to the seminar meetings a wealth of background, experience, and understanding which added measurably to the overall proceedings.

4. Please accept my gratitude for an outstanding effort which was a credit to you and your organization.

  
R. R. PLOGER  
Major General, USA  
Director of Topography  
and Military Engineering
